

# KFGA Mobile App – Bridging Growers & Buyers for Smarter Auctions

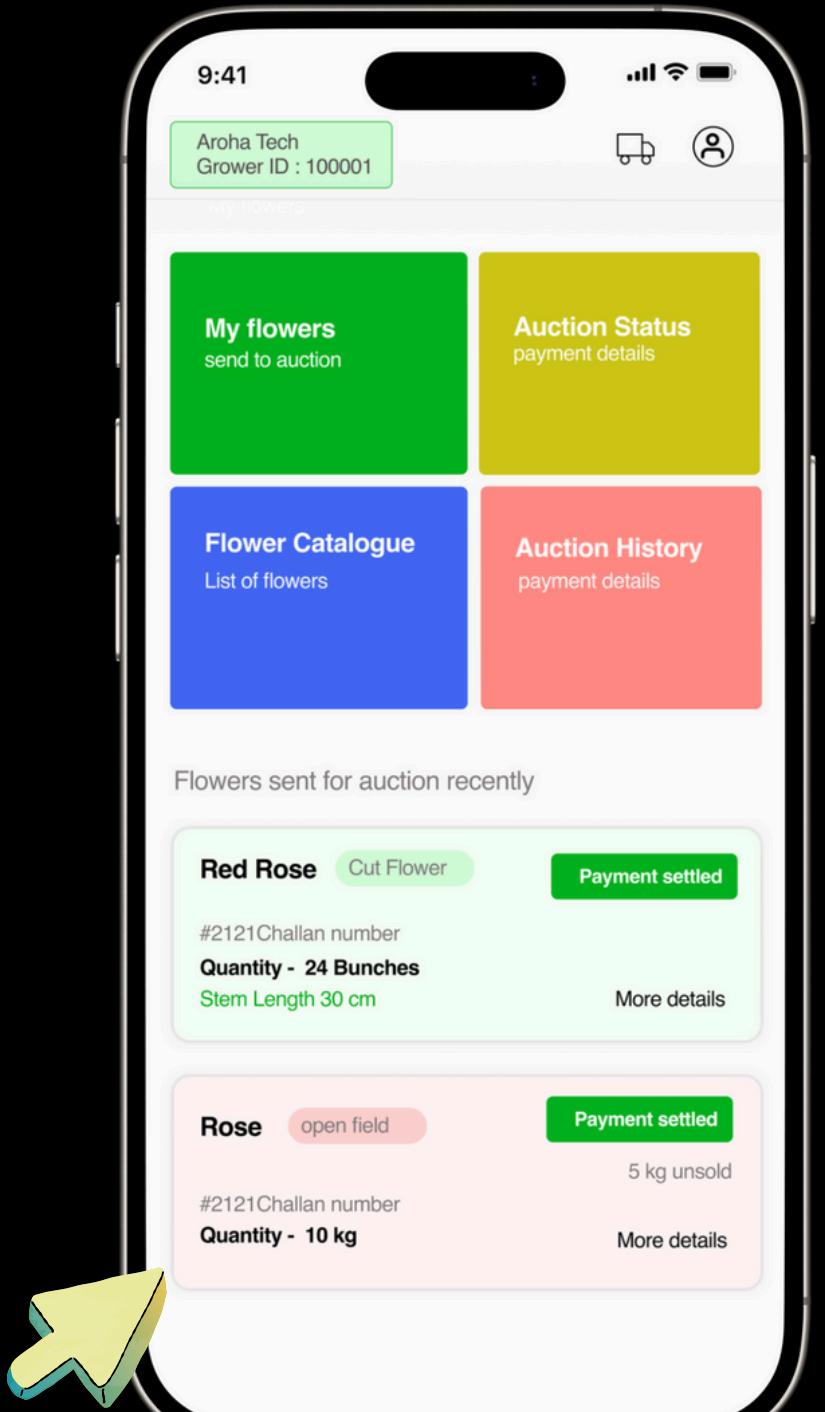

The KFGA Mobile App is a seamless digital platform designed to connect growers and buyers in the agricultural industry. By leveraging real-time auction features, the app ensures that fresh produce reaches the right buyers at competitive prices, enhancing transparency and efficiency in the marketplace.

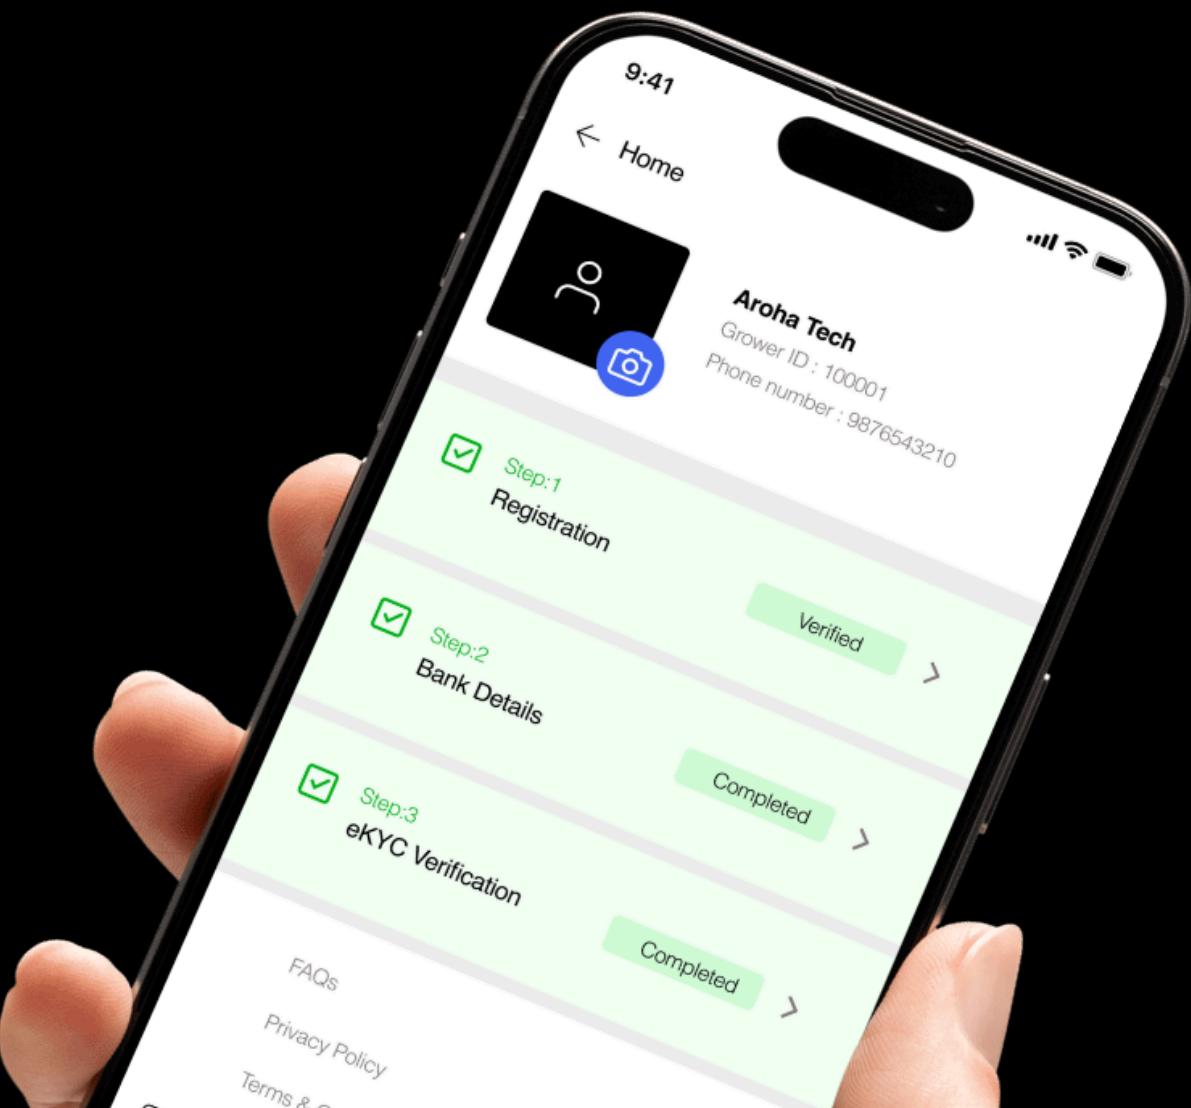

# For Growers:

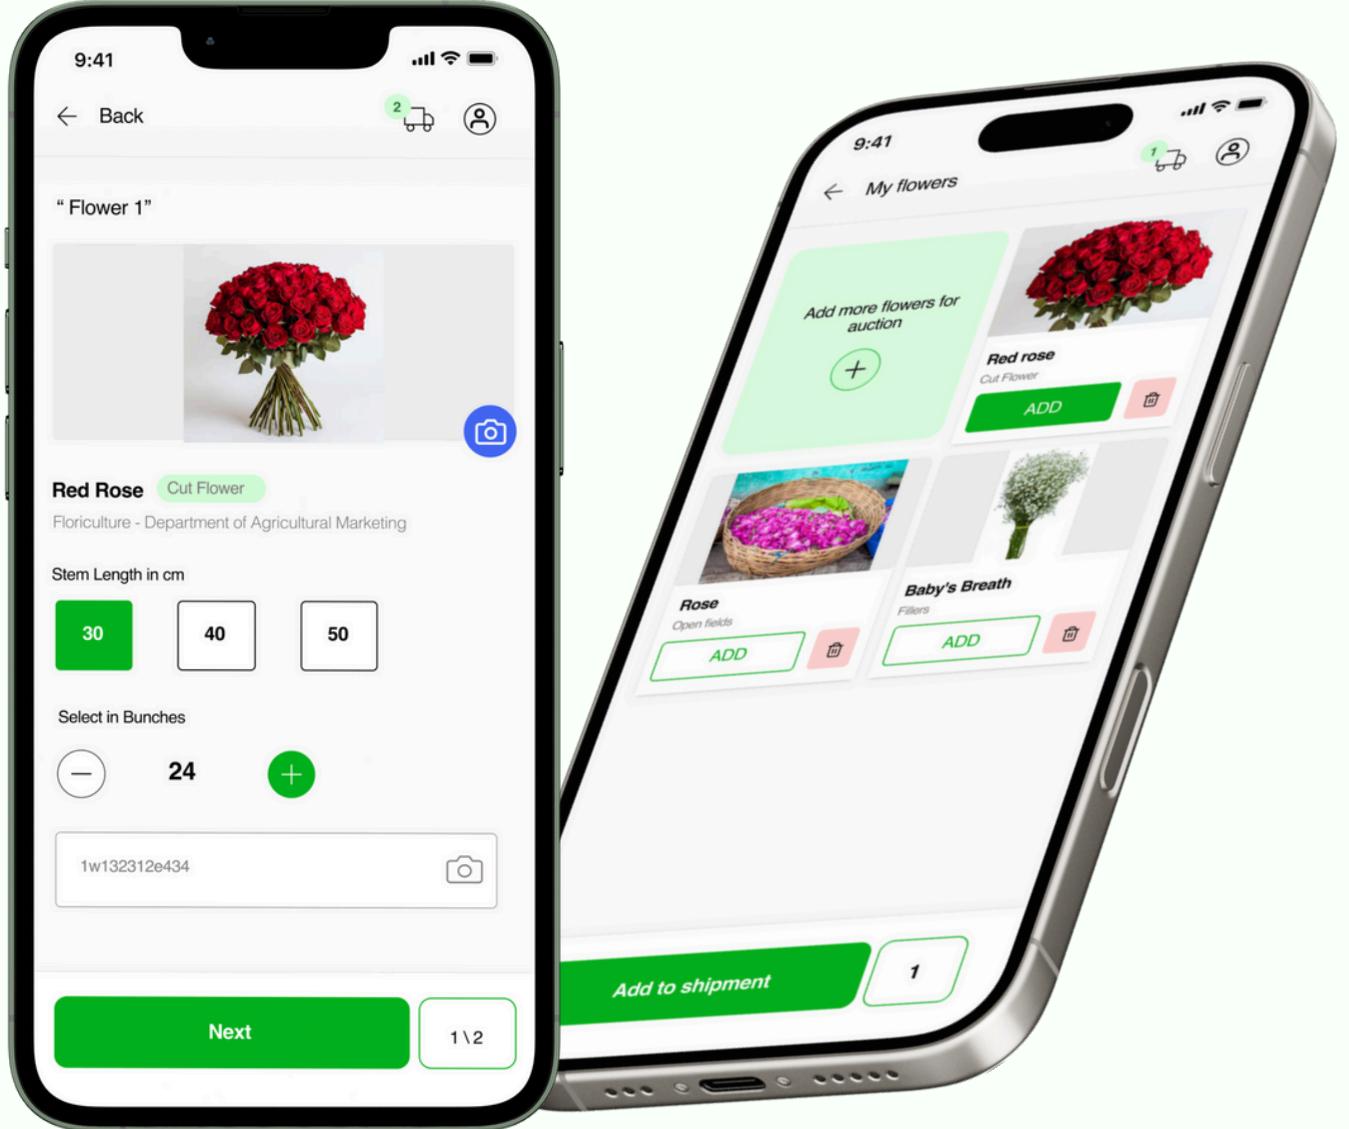

- Easily list produce for auction.
- Gain access to a wider network of buyers.
- Secure fair market prices with transparent bidding.

The KFGA Mobile App is a seamless digital platform designed to connect growers and buyers in the agricultural industry. By leveraging real-time auction features, the app ensures that fresh produce reaches the right buyers at competitive prices, enhancing transparency and efficiency in the marketplace.

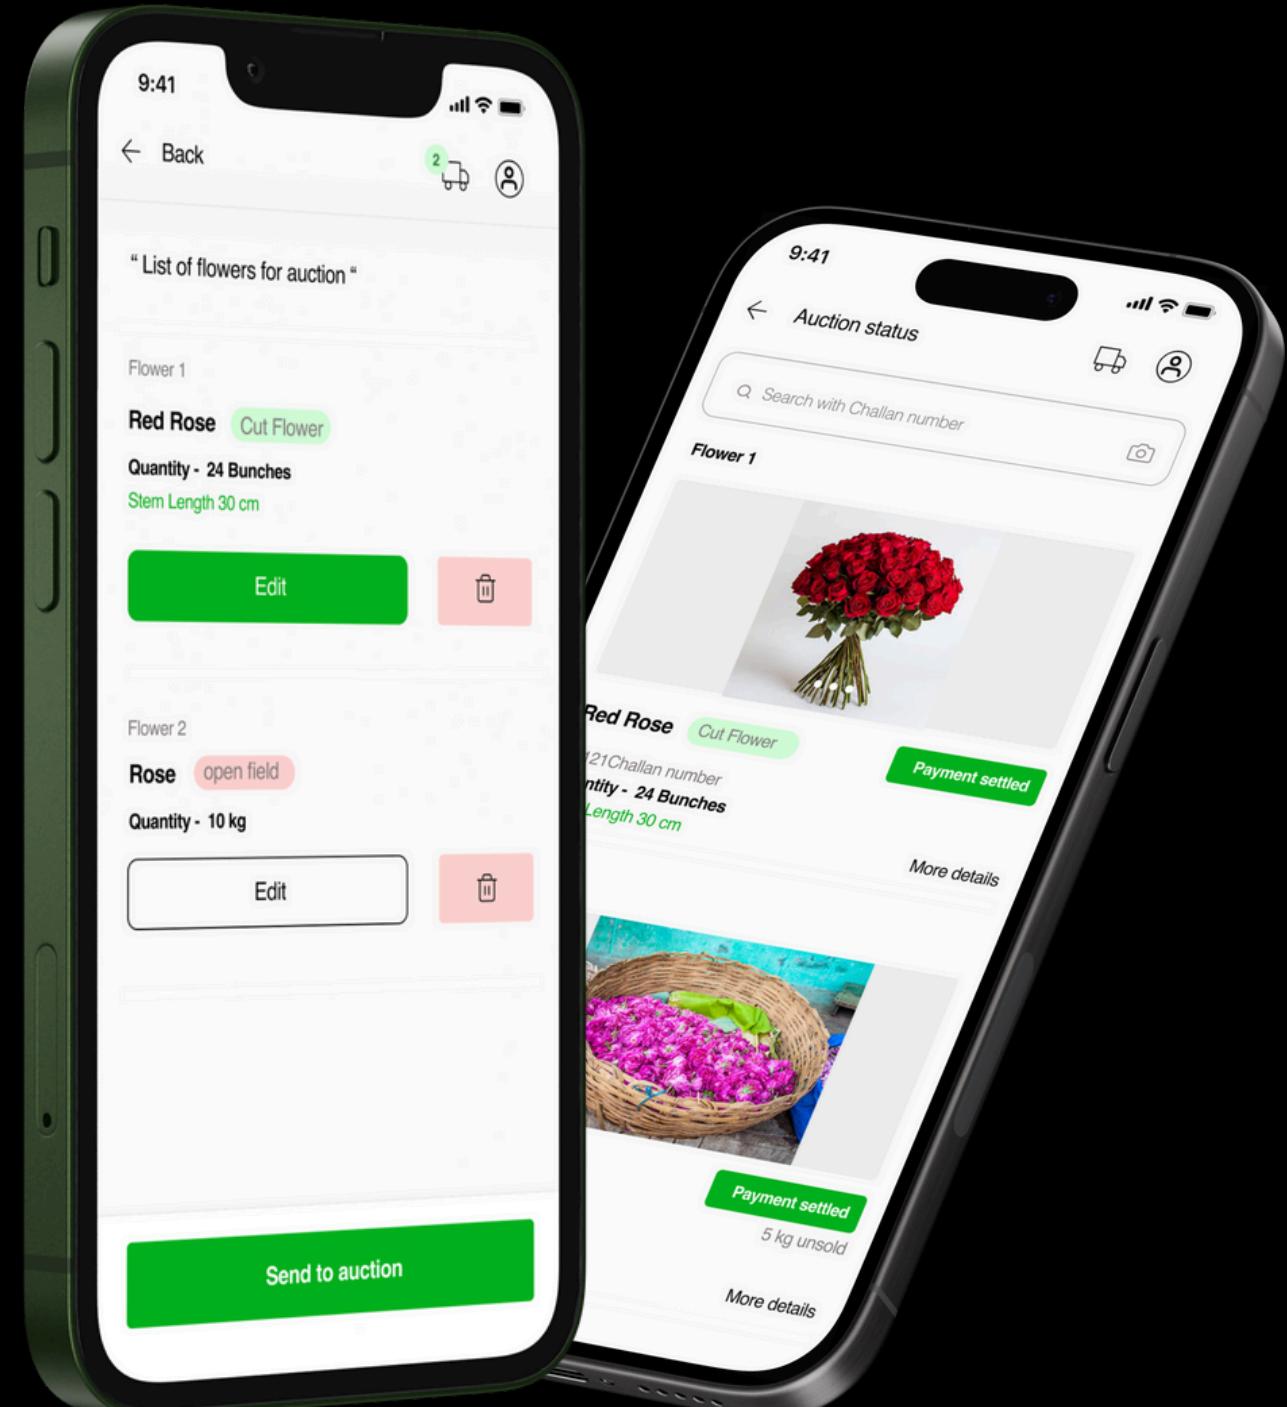

# Effortless Auction Management

With its user-friendly interface and smart bidding system, KFGA Mobile revolutionizes agricultural trade, ensuring fair, fast, and reliable transactions between growers and buyers.

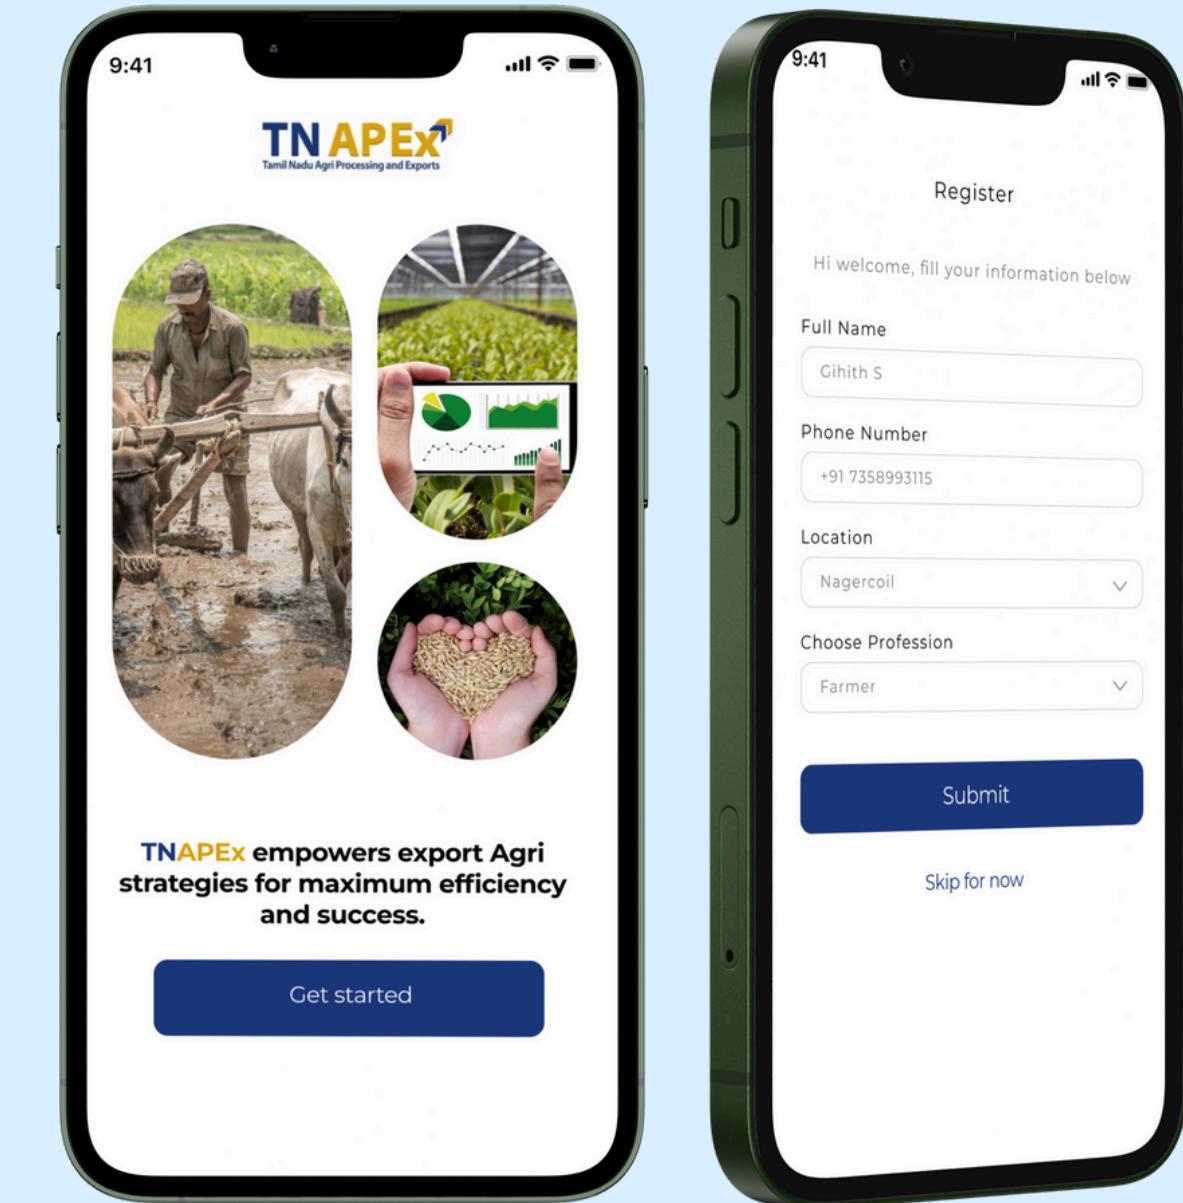

# Seamless Tracking & Payments

This application is used to prevent food and goods from going to waste and helps identify nearby cold storage facilities for farmers. Tamil Nadu aims to encourage people to utilize this facility.

IOS/Android

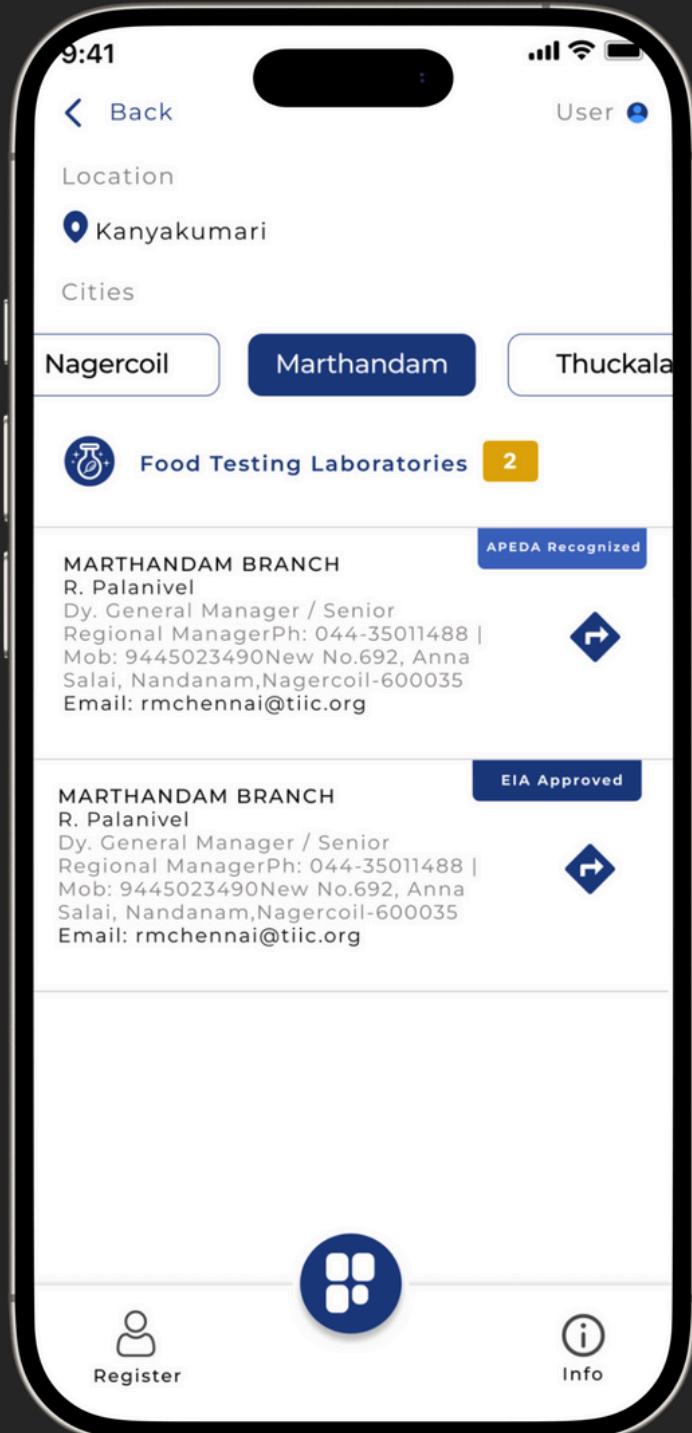

## Effortless Navigation with Clickable Map-Based Selection

The user flow is designed for ease of use with clickable options, eliminating the need for data entry. Users can simply select locations on the map, which displays filtered data based on their city and state.

# Seamless User Experience

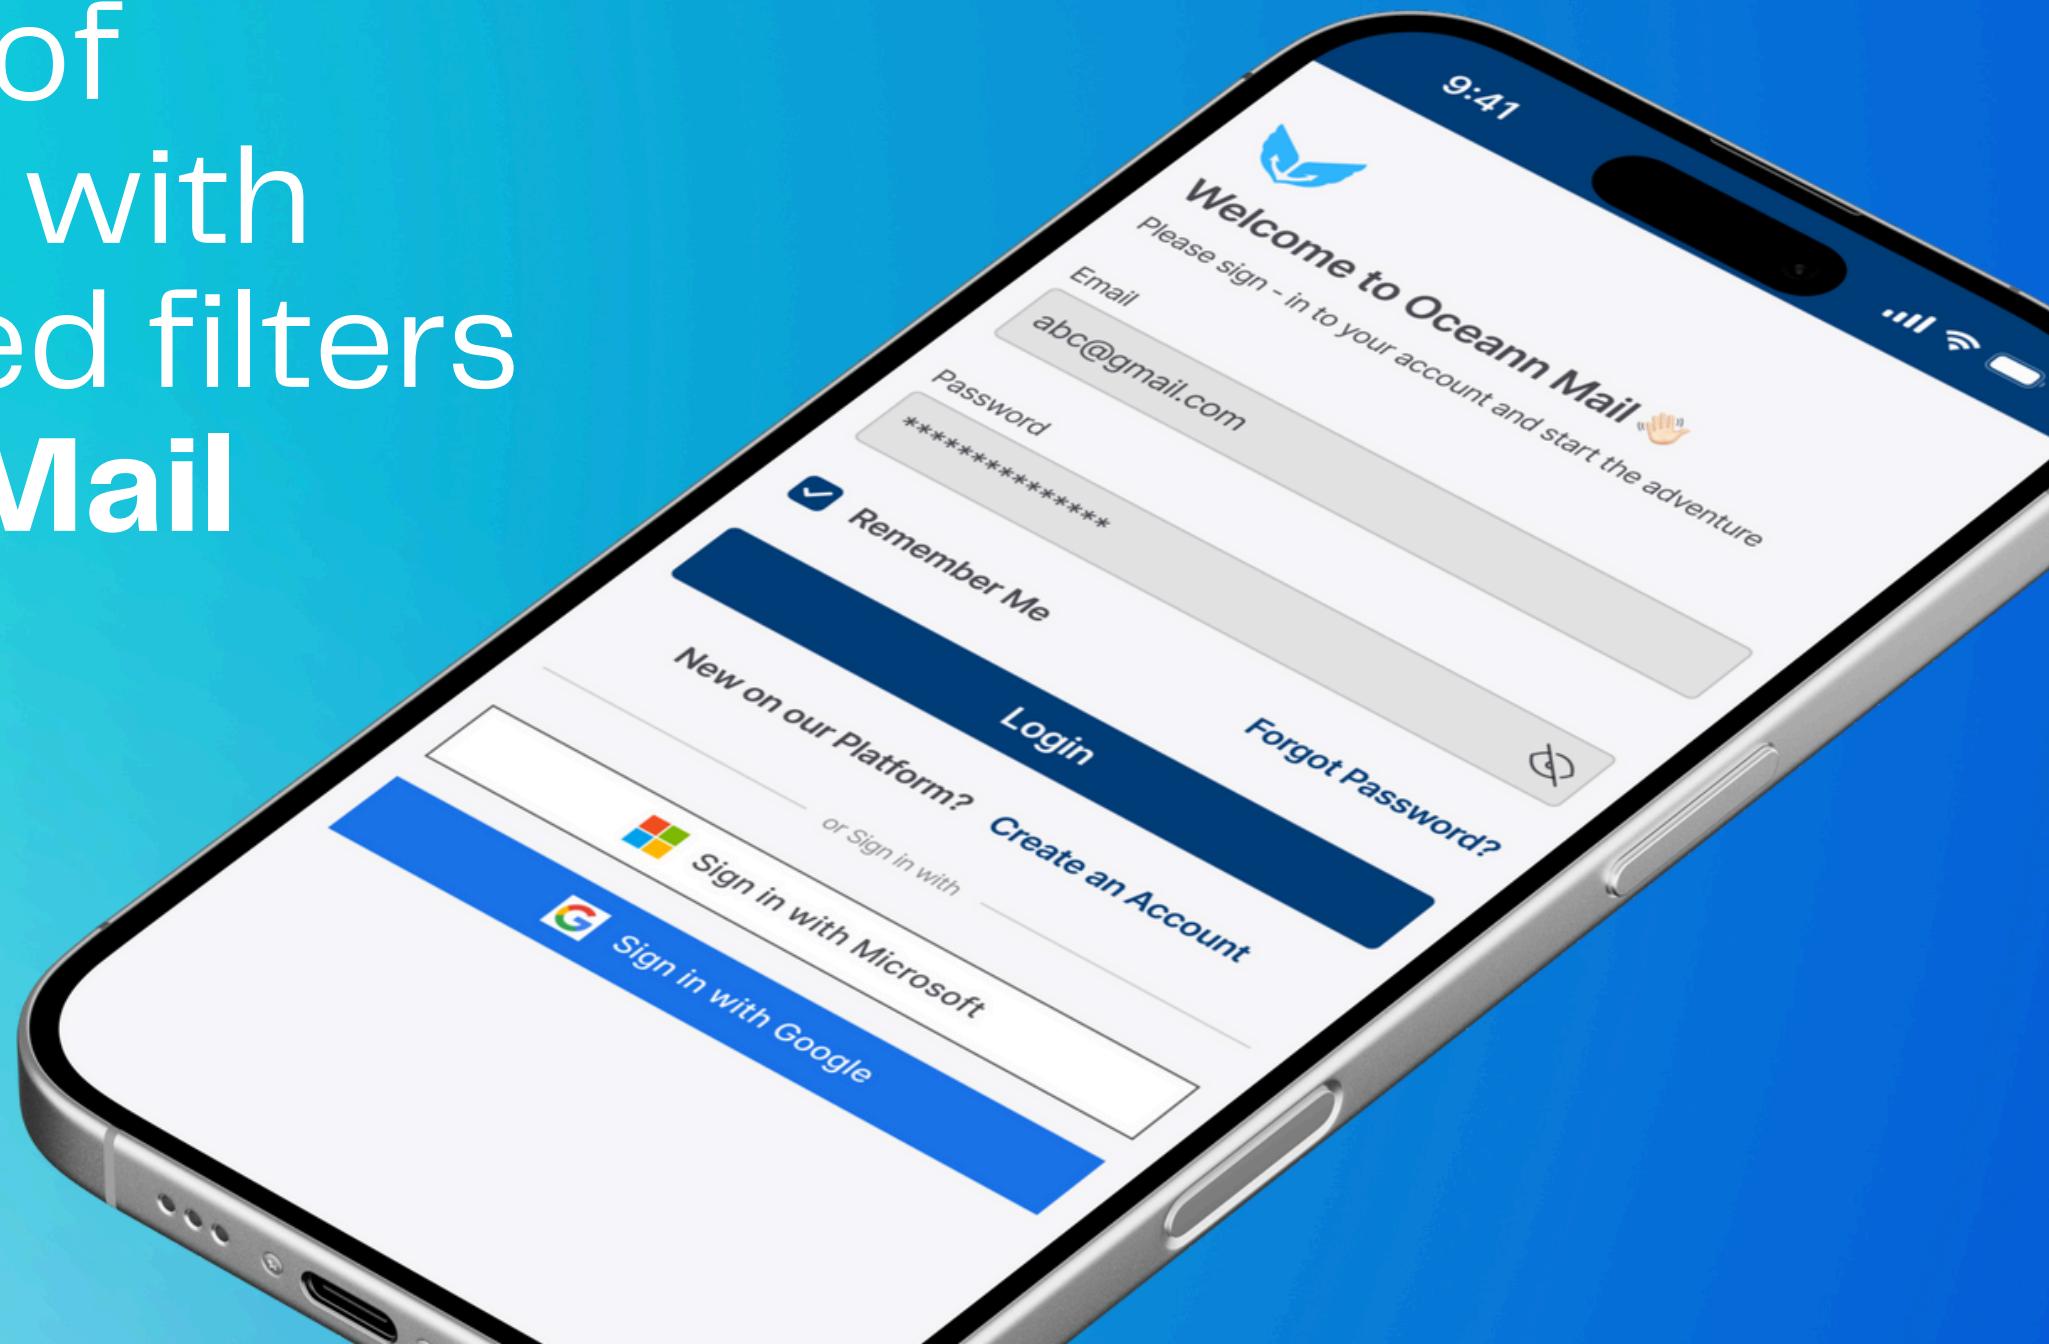

- No Data Entry: Users can simply click and select options instead of manually entering data, reducing friction.
- Interactive Map-Based Navigation: A D3-powered map enables users to easily find nearby cold storage facilities by selecting their city and state.
- Smart Filtering: The app automatically displays relevant cold storage locations based on the user's geographical location.

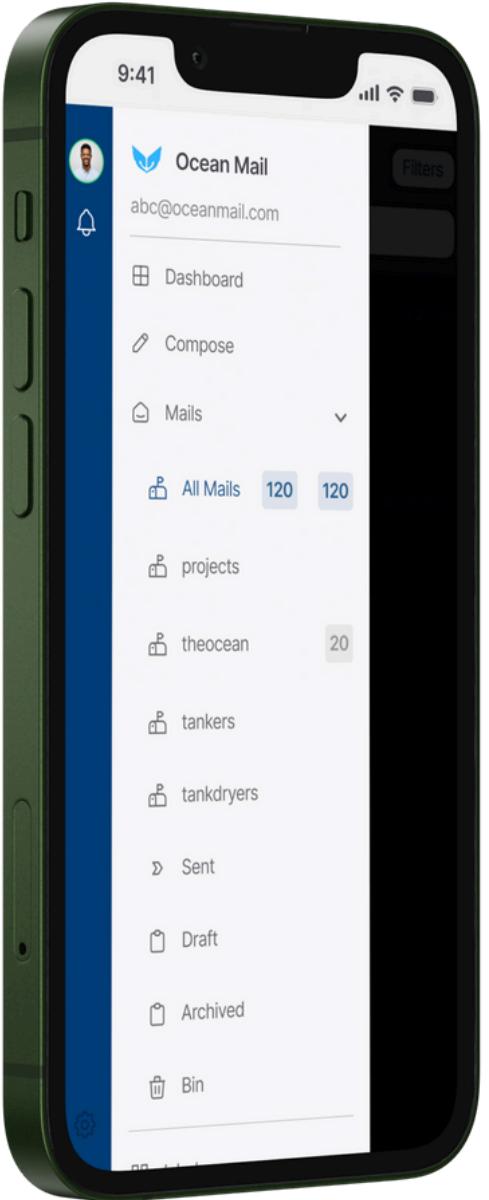

## Positive Impact

- Reduced Food Waste: Ensures surplus food is stored properly rather than being wasted.
- Increased Farmer Income: Farmers can store perishable goods longer, sell at better prices, and reduce losses.
- Better Supply Chain Efficiency: Helps distributors and retailers access stored goods efficiently, strengthening the market.

Outlook with  
advanced filters  
**Ocean Mail**

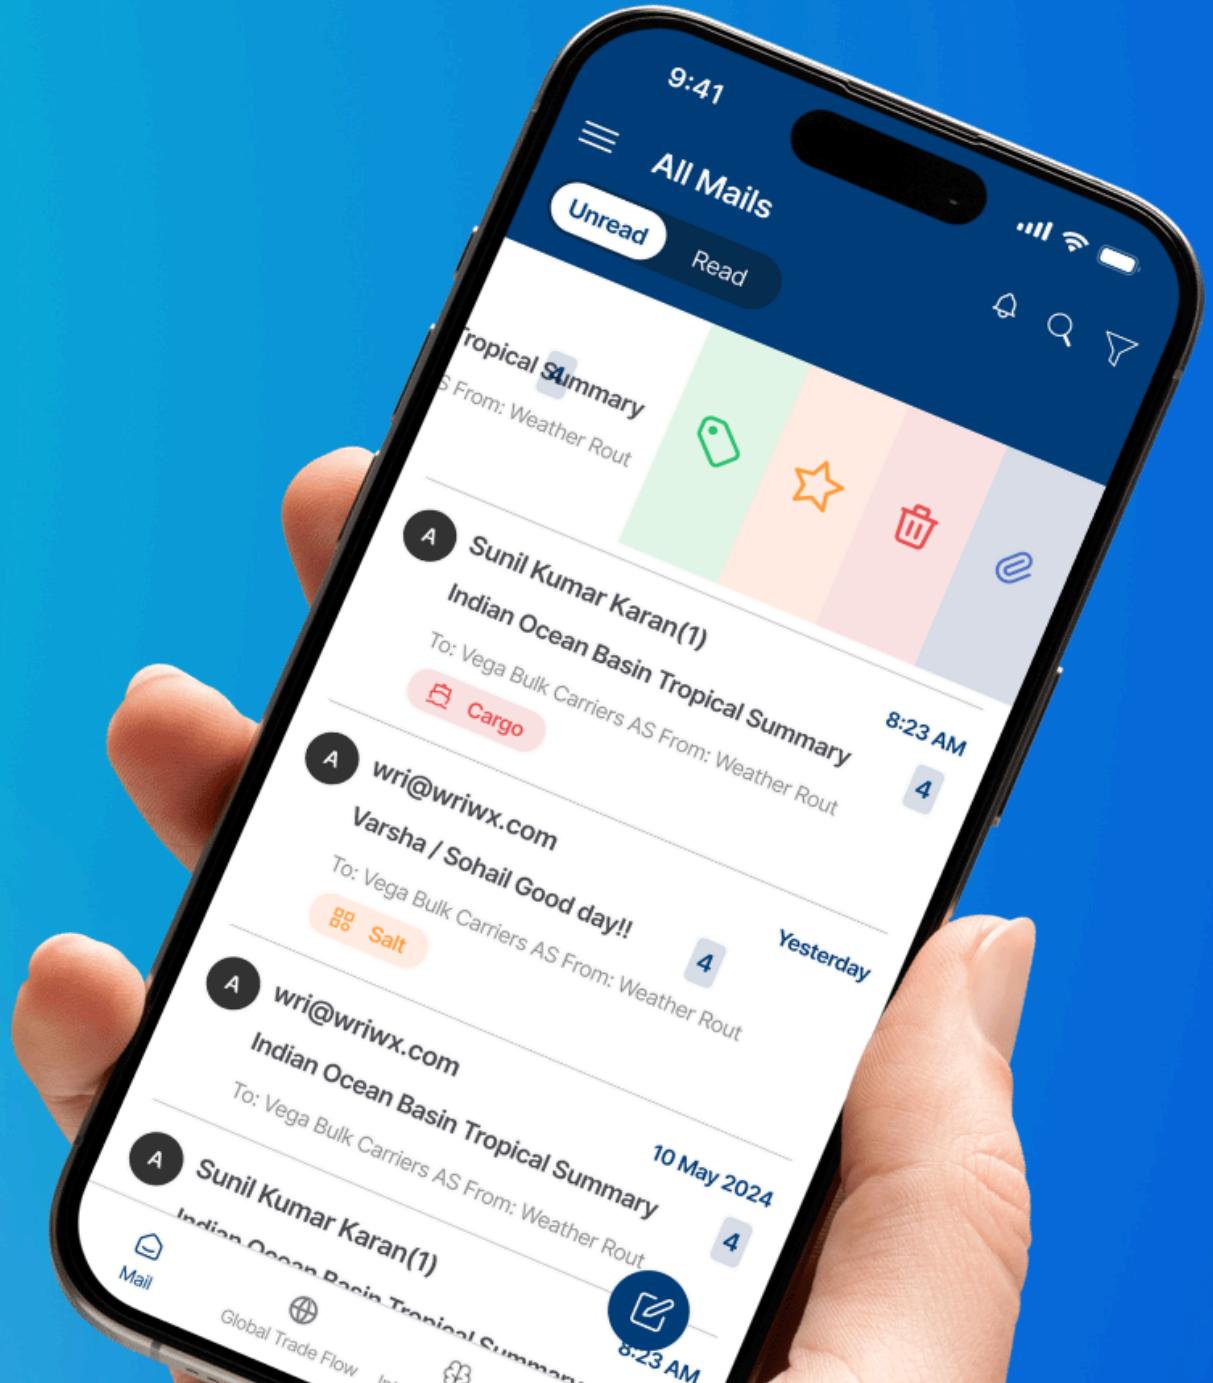

# Smart Inbox with Cargo & Merchant Filters

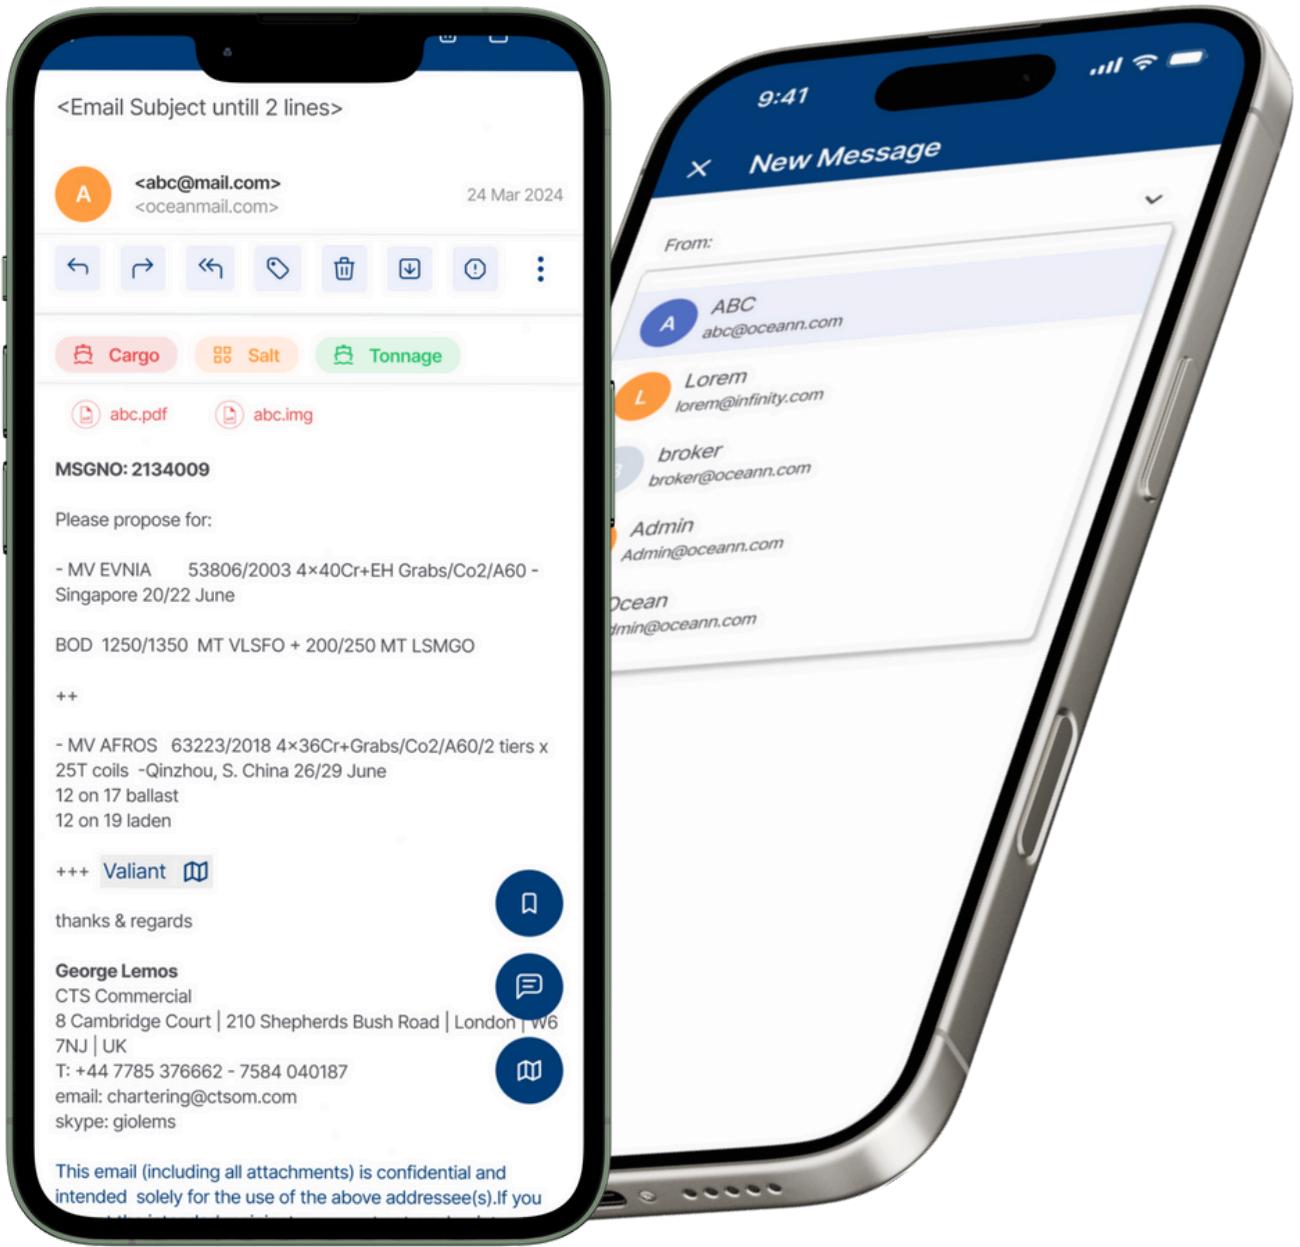

Ocean Mail streamlines communication by categorizing messages based on sender type. Mariners and cargo professionals receive a high volume of messages daily, and these smart filters ensure quick access to relevant emails without manual sorting.

# Real-Time Message Prioritization

Important messages, such as urgent cargo updates or navigation alerts, are automatically prioritized. Users can customize notification settings for specific message types, ensuring they never miss critical updates while onboard.
